Disbursement of Home Loans

Banque Ravina, Antananarivo · Policy CP-HL-012 · Version 1.3 · 2 February 2026 · Internal use only

1. Purpose and scope

This policy fixes the rules for the payment of a home loan. The bank pays each home loan in one payment to the notary of the buyer. The policy applies to each home loan of 50,000 EUR or more that the head office or a branch grants. It runs from the signature of the loan agreement to the payment of the funds to the notary.

2. Roles

1. The **client advisor** assembles the file and keeps the contact with the client and the notary.
2. The **credit analyst** checks the financial conditions and the valuation of the property.
3. The **legal officer** checks the deed of sale, the mortgage and the insurance documents.
4. The **risk officer** signs the conditions precedent checklist before each payment.
5. The **branch director** approves each file above the threshold of section 5.
6. The **disbursement officer** (back office) pays the funds and records the payment.

3. Procedure

1. **File assembly.** The client advisor assembles the disbursement file within 3 working days after the signature of the loan agreement. The file holds the signed loan agreement, the draft deed of sale, the insurance certificate and the completion statement of the notary. Decision: the file is complete, or the advisor requests the missing documents.
2. **Financial check.** The credit analyst checks the repayment capacity, the down payment and the valuation report within 1 working day. The analyst reads the payslips and the bank statements of the last 3 months. Decision: confirm, or return the file.
3. **Legal check.** The legal officer checks the deed, the mortgage registration and the insurance certificate within 3 working days. Decision: clear, or reject the file.
4. **Conditions precedent.** The risk officer checks each condition of section 4 within 1 working day and signs the checklist. Decision: approve, or return the file.
5. **Approval.** The branch director approves each file above 300,000 EUR within 2 working days. Decision: approve, or reject.
6. **Payment.** The disbursement officer pays the full loan amount to the notary account within 24 hours after the last approval. The payment order carries the loan reference and the signed checklist. Decision: pay, or hold.

7. **Records.** The disbursement officer records the payment in the core banking system on the same day. The officer archives the complete file within 5 working days.

> A file with a missing document goes back to the client advisor. The check of step 2, 3 or 4 sends the return within 24 hours. The client advisor has 5 working days to complete the file. After two returns, the file goes to the branch director for a decision.

4. Conditions precedent

The bank pays no funds before the risk officer signs a checklist that confirms each condition below.

1. The debt-to-income ratio of the household is 33 % or less.
2. The down payment is 20 % or more of the purchase price.
3. Both parties signed the loan agreement.
4. The property insurance certificate is present, and the cover starts not later than the payment date.
5. The bank holds a first rank mortgage on the property, registered before the payment date.
6. The loan offer is not older than 4 months on the payment date.
7. The valuation report gives a value of 100 % or more of the purchase price.
8. The completion statement of the notary names the bank, the client and the loan reference.

5. Thresholds and escalation

- Each file above 300,000 EUR needs the approval of the branch director before the payment.
- Each file above 600,000 EUR needs also the approval of the credit committee.
- A missing document sends the file back to the client advisor, with 5 working days to complete it. This is the return loop of section 3.
- A payment order without a signed checklist stops. The disbursement officer holds the order and informs the risk officer within 4 working hours.

6. Records and audit

The back office stores the complete file for 10 years after the payment. Each payment order keeps the reference of the signed checklist. The internal audit samples 10 files per branch each year and checks this policy.
